The durable care bed for
safety and comfort

High safe working load

- electrically adjustable:
175 kg
- mechanically adjustable:
225 kg

The durable care bed for patient comfort

Comfort and safety for the occupant, alleviation for care staff and an unique design – the Classiko unites many strengths to offer good value for money. This **durable care bed** has the advantage of robust design and a range of adjustment options that make every-day life more agreeable.

The **four-section mattress base** adapts to suit many different needs. For example, by raising the back and thigh rests and tilting the bed into the optional

reverse Trendelenburg position, the occupant is moved into a comfortable sitting position for eating or watching television. With a height adjustment range from 40 to 80 cm, the Classiko makes getting in and out of bed easy and safe while ensuring **an ergonomic working position** for care staff.

The motorised model of the bed can be operated effortlessly with a **selectively lockable handset**.

An electrically adjustable bed is not necessary in all situations. Stiegmeyer therefore also offers the Classiko in a **mechanical version**. By dispensing with cables and manually removable elements, this model meets the **safety requirements in psychiatric care** particularly well. With a high safe working load of 225 kg, it is also suitable for heavier occupants.

Care staff will find the mechanical Classiko easy to operate. Height adjustments via the footpedal with

the help of a **hydraulic pump** can be made just as easily as the force-assisted adjustments of the back and thigh rests. The Classiko offers visual appeal with a large selection of different **head and footboards** and **wood decors** to suit individual requirements.

Optimum protection for the occupant

The safety sides on the Classiko can be adjusted to meet the individual protection needs of the occupant. The standard version of the bed is equipped with **full-length safety sides** on both sides of the mattress base for optimum safety (Figure 1).

If the occupant's mobility needs to be supported, then the **combinable half-length safety sides** are a good choice (Figure 3). When raised at the head end only, enough room is left for getting in and out of bed.

The split safety side can also be combined with a full-length safety side on the other side of the bed.

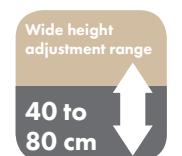

Independent occupants with good mobility will not need safety sides at all – in this case, the Classiko can be fitted with a **fixed side facing**, which lends the bed a particularly homelike style (large picture).

With its equipment and accessory options, the Classiko is a comfortable bed that can be adapted to meet

individual requirements. The four-section mattress base with steel wire mesh is robust and flexible (Figure 2). In the motorised model, the **auto-contour setting** and the **sliding backrest** help protect the occupant from shear forces.

For taller patients, we recommend **bed extensions** to 210 or 220 cm (Figure 4). Matching mattress extension elements and extended safety side bars are also available.

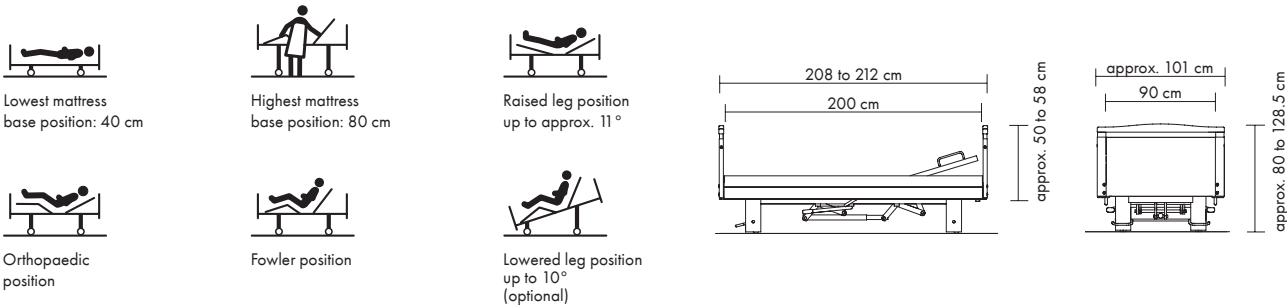

The Classiko is easy to move and manoeuvre. Thanks to its **centrall locking castors**, care staff can lock or unlock all four castors at once, by pressing one brake pedal (Figure 5). The motorised model is operated by use of a **handset**, which shows all of the options as easily understandable pictograms (Figure 6). Individual functions can be blocked for the occupant's safety, if required.

Technical data

Dimensions and weights	Classiko
External dimensions (depending on the wooden surround)	approx. 208 x 101 cm
Mattress base (mattress dimensions)	200 x 90 cm
Backrest length compensation	approx. 10 cm
Safe working load	175 kg electrical
	225 kg mechanical
Ground clearance	approx. 15 cm
Total weight	approx. 130 kg

Dimensions and adjustment ranges

Safety and comfort for psychiatric care

The mechanical model of the Classiko is perfectly suited to the high safety requirements in psychiatric care. Since it has **no cables** and its components are protected against removal, it prevents patient injuries and damage to the bed. At the same time, the comfort and **homelike appearance** of the Classiko enhances patient wellbeing.
